

## CALL FOR PARTICIPATION

<http://www.sigmobile.org/mobisys/2004/>

Building on last year's successful launch, this is the second edition of MobiSys, the conference on Mobile Systems, Applications, and Services. MobiSys places strong emphasis on practical experiences gained from designing, building and using mobile systems and applications.

MobiSys 2004 will bring together engineers, academic and industrial researchers, and visionaries for three exciting days of sharing and learning about this fast-moving field. A poster session about ongoing research projects, plus video and live demos of working systems, will complement a highly selective and diverse technical program with paper presentations and panels.

Come join us in Boston for MobiSys 2004!

### Highlights

- Keynote by **Prof. Ben Shneiderman**, University of Maryland: Human Needs and Mobile Technologies: Small, Fast, and Fun
- Keynote by **Dr. Genevieve Bell**, Intel Research: Talking Phones: A Cultural Reading of Mobile Technologies
- Panel discussion on Radio Frequency Identification Tags (RFID)
- Poster, demo, and video sessions

### Workshops

Two workshops will be held prior to the conference to focus on specific application areas:

- Workshop on **Applications of Mobile Embedded Systems**
- Workshop on **Context Awareness**

### Location

Hyatt Harborside Hotel, Boston, USA

### Registration

Early registration for the conference ends on May 25. Register early and save! Student and ACM/USENIX member discounts available.

**USENIX**

**IBM**

**intel**

Microsoft  
**Research**

Jointly sponsored by ACM SIGMOBILE and The USENIX Association, in cooperation with ACM SIGOPS. With support from NTT DoCoMo USA Labs, HP, IBM, Intel, and Microsoft.
