

MobiSys 2013

The 11th ACM International Conference on Mobile Systems, Applications, and Services

Call For Papers

MobiSys 2013 will continue the tradition of publishing top-notch research papers dealing with all aspects of mobile systems. MobiSys seeks original papers that take a broad systems perspective rather than focus narrowly on low-level components. Of particular interest are technical contributions that enable new and compelling mobile scenarios and applications. The conference values results and insights obtained from working implementations more highly than those obtained solely from simulations. If you have any questions regarding relevance or other submission-related issues, please contact the program chairs at mobisys_pcchairs13@acm.org

Topics of interest include, but are not limited to:

- Experience with mobile applications, networks and systems
- Innovative mobile and mobile sensing applications
- Tools for building and measuring mobile systems
- Wearable computing and innovative mobile devices
- Software architectures for mobile devices
- Data management for mobile applications
- Infrastructure support for node mobility
- System-level energy management for mobile devices
- Operating systems for mobile devices
- Support for mobile social networking and mobile Web
- Security and privacy in mobile systems
- Systems for location and context sensing and awareness
- Mobile computing support for pervasive computing
- Vehicular wireless systems
- User interfaces and usability for mobile applications and systems
- Personal-area networks and systems
- Cyber foraging and resource discovery for mobile systems
